

# Mathiyazhagan L

## AI & Data Science Undergraduate | AI/ML Developer

Phone: +91 9498639188 | Location: Ranipet, Tamil Nadu | Email: [droptomathi422@gmail.com](mailto:droptomathi422@gmail.com) |

LinkedIn: [linkedin.com/in/mathiyazhagan-l](https://www.linkedin.com/in/mathiyazhagan-l) | GitHub: [github.com/Mathiyazhagan-L](https://github.com/Mathiyazhagan-L)

### Summary

AI & Data Science undergraduate specializing in Machine Learning, Deep Learning, and Generative AI. Experienced in building end-to-end AI applications using Python, LangChain, Flask, and vector databases. Developed projects including RAG-based chatbots, computer vision systems, and AI-powered web applications. Skilled in NLP, model development, and real-world problem solving with a strong interest in scalable AI solutions. Seeking opportunities in AI Engineering, Machine Learning, and Software Development.

### Technical Skills

- **Languages:** Python, SQL
- **Machine Learning & Deep Learning :** Supervised Learning, Unsupervised Learning, CNN, Neural Networks
- **Generative AI:** LangChain, RAG, Hugging Face, OpenAI API, Gemini API,Flowise
- **Computer Vision:** OpenCV, Face Recognition, Image Processing
- **NLP:** Tokenization, Embeddings, Text Processing
- **Tools & Platforms:** Git, VS Code, Google Colab, Kaggle,Jupyter Notebook

### Experience

#### Machine Learning Intern

Jul 2025 – Aug 2025

*Femtosoftware Technologies*

*Tools Used: Python, Scikit-learn*

Completed a structured internship focused on Machine Learning concepts and real-world applications. Worked on data preprocessing, basic model building, and evaluation techniques using Python. Gained hands-on experience with supervised and unsupervised learning algorithms and understood end-to-end ML workflows.

### Projects

#### RAG-based YouTube Summarizer | *Python, LangChain, Pinecone, Gemini API*

- Built a Retrieval-Augmented Generation (RAG) system to summarize YouTube videos.
- Extracted transcripts and generated context-aware summaries using LLMs.
- Improved contextual response accuracy using Pinecone vector similarity search

#### Face Recognition Attendance System | *Python, OpenCV, CNN*

- Developed real-time face recognition system for automated attendance tracking.
- Built real-time face recognition pipeline using OpenCV and CNN-based feature extraction
- Improved accuracy and reduced manual effort.

#### AI Research Agent (Telegram News Bot) | *Python, APIs, Telegram Bot*

- Built an automated system to fetch latest news and deliver daily updates via Telegram.
- Integrated APIs for real-time data extraction and scheduling.
- Enabled consistent and automated information delivery.

### Awards & Certifications

NPTEL – The Joy of Computing Using Python

NPTEL – Python for Data Science

AWS Skill Builder – Cloud Essentials

Microsoft – Introduction to AI Concepts

Workshop on AI & Deep Learning – Firstbit Solutions

Microsoft – Generative AI and AI agents

Prompt Engineering – Udemy

Anthropic Claude AI Courses

AR/VR and Robotics Training – Completed

Hackathon Participant –Codeathon, Aarambh (Gemini )

### Education

#### B.Tech Artificial Intelligence & Data Science (Pursuing)

*Prathyusha Engineering college*

**Expected Graduation: 2027**

*CGPA: 8.2/10*
