Summary

AI & Data Science student specializing in Machine Learning, Deep Learning, and Generative AI. Experienced in building end-to-end AI systems using Python, LangChain, and vector databases. Developed projects such as RAG chatbot and computer vision applications. Skilled in NLP, model development, and real-world problem solving. Seeking an AI Engineer role to build scalable AI solutions.

Technical Skills

Programming & Querying: SQL, Python

Machine Learning: Scikit-learn, Supervised Learning, Unsupervised Learning, Model Evaluation

Deep Learning: TensorFlow, PyTorch, CNN, Neural Networks

Generative AI: LangChain, RAG, Hugging Face, OpenAI API, Gemini API

Natural Language Processing: Text Processing, Tokenization, Embeddings

Computer Vision: OpenCV, Image Processing, Face Recognition

Tools & Technologies: Git, VS Code, Google Colab, Kaggle

Prompt Engineering: Prompt Design, Few-shot Prompting, Chain-of-Thought Prompting, Context Optimization

Experience

Machine Learning Intern

Jul 2025 – Aug 2025

Femtosoftware Technologies

Tools Used: Python, Scikit-learn

Completed a structured internship focused on Machine Learning concepts and real-world applications. Worked on data preprocessing, basic model building, and evaluation techniques using Python. Gained hands-on experience with supervised and unsupervised learning algorithms and understood end-to-end ML workflows.

Projects

RAG-based YouTube Summarizer | Python, LangChain, Pinecone, Gemini API

- Built a Retrieval-Augmented Generation (RAG) system to summarize YouTube videos.
- Extracted transcripts and generated context-aware summaries using LLMs.
- Improved response relevance using vector database retrieval.
-

Face Recognition Attendance System | Python, OpenCV, CNN

- Developed real-time face recognition system for automated attendance tracking.
- Applied computer vision techniques for face detection and identification.
- Improved accuracy and reduced manual effort.

AI Research Agent (Telegram News Bot) | Python, APIs, Telegram Bot

- Built an automated system to fetch latest news and deliver daily updates via Telegram.
- Integrated APIs for real-time data extraction and scheduling.
- Enabled consistent and automated information delivery.

Awards & Certifications

NPTEL Certifications: The Joy of Computing Using Python, Python for Data Science ; **Prompt Engineering** – Udemy; **AR/VR and Robotics Training** – Completed; **Workshop on AI & Deep Learning** – Firstbit Solutions; **Workshop on Darknet** – CIT College; and **Hackathons:** Codeathon, Aarambh (Google Gemini – Veltech) .

Education

B.Tech Artificial Intelligence & Data Science (Pursuing)

Prathyusha Engineering college

Expected Graduation: 2027

CGPA: 8.2/10
